

SHAPING THE FUTURE OF DIGITAL FARMING

DIGITAL INNOVATION FARM TECH-BOX PARK

+

Hartpury's vision is to radically develop its 360-hectare campus to create a pioneering Digital Innovation Farm, in response to an increasingly digital world with global demand for new technology in farming.

The Tech Box Park is a new kind of workspace dedicated to enabling the growth and development of Gloucestershire's agri-tech businesses.

Solving 'real world' agricultural problems

Hartpury's Tech Box Park offers dedicated 'accelerator' working space and support packages, access to Hartpury's commercial farm, Home Farm and an extended farming network for practical trials and feasibility testing across the county where businesses can explore, test, research and develop new products, or enhance existing ones.

+
